

A TALK BY MAYANK JAIN

AI Won't Replace You. An Owner Using AI Will.

"AI se kaam kam hoga ya confusion zyada?"

No futurism and no tool tour. Five everyday jobs in an owner-run business, done live with AI tools on stage, plus the three mistakes that make AI a risk instead of a help.

WHY THIS TALK, WHY NOW

01

Everyone is talking about AI; few owners know where it actually saves time in their business.

02

Teams already paste customer data into AI tools with no rules.

03

Automating a broken process only makes the mess faster.

ABOUT THE SPEAKER

Mayank Jain is a business growth and automation consultant from Jaipur. Since 2015 he has helped 240+ owner-run businesses replace hustle with systems for leads, follow-up and operations. He founded NLET Solutions (2017), whose platform runs in 1,000+ schools and colleges, and Proofbox (2022), a growth and performance marketing firm. He is the author of *Jugaad Is Not a System* and *Stop Pitching. Start Winning.*

AI Won't Replace You. An Owner Using AI Will.

“AI se kaam kam hoga ya confusion zyada?”

Owners leave with five jobs they can hand to AI this week, and the rules that keep it safe.

THE TALK IN 4 MOVES

1

Hype vs real

What AI tools do well today, what they do badly, and how to tell the difference in your own business.

2

5 live demos

Enquiry replies · quotes · report summaries · SOP drafts · follow-up messages. Each one done live, with a prompt the audience can copy.

• Live: 5 demos on stage

3

3 mistakes to avoid

Customer data in the wrong place · trusting the output blindly · automating a broken process.

4

The first step

One job to hand to AI this week, and how to check it is working.

YOUR AUDIENCE WALKS AWAY WITH

A prompt pack for the 5 uses

Copy-ready prompts for replies, quotes, reports, SOPs and follow-ups.

A simple AI usage policy for the team

One page the team signs: what never goes into an AI tool.

An "is this worth automating?" checklist

Seven questions to run before automating anything.
